IN LINE X-SAM

AMX Automatrix srl_ All Rights Reserved

BEGIN FROM THE DEEP

The AMX X-SAM is a new system designed for quality control in power electronics industries. A non-destructive inspection able to simplify the manufacturing process.

Using an **Amx patented system**, components on the "Top side" of the substrates are preserved. Based on Amx In Line modular station, it guarantees flexibility and accuracy during the testing stage.

A fully automatic Inline solution customized on the client's design and requirements.

SINTERING PACKAGE

A complete key-in-hand solution with a multi-patents world class system.

HIGH-PERFORMING TECHNOLOGY

Non-Destructive Testing, which allow to control 100% of the sintered parts.

CSPE

Amx patented a Containment System for Power Electronics substrates (CSPE) to perform ultrasonic analysis in partial immersion.
